

# This is our great company.

## Who we are?

According to the National Oceanic and Atmospheric Administration, Ted Scambos, NSIDC lead scientist, puts the potentially record low maximum sea ice extent this year down to low ice extent in the Pacific and a late drop in ice extent in the Barents Sea.

"Over the span of the satellite record, Arctic sea ice has been declining significantly, while sea ice in the Antarctic has increased very slightly"

-NOAA

So what does the new record for the lowest level of winter ice actually mean

The Arctic Ocean freezes every winter and much of the sea-ice then thaws every summer, and that process will continue whatever happens with climate change. Even if the Arctic continues to be one of the fastest-warming regions of the world, it will always be plunged into bitterly cold polar dark every winter. And year-by-year, for all kinds of natural reasons, there's huge variety of the state of the ice.

For a start, it does not automatically follow that a record amount of ice will melt this summer. More important for determining the size of the annual thaw is the state of the weather as the midnight sun approaches and temperatures rise. But over the more than 30 years of satellite records, scientists have observed a clear pattern of decline, decade-by-decade.

The Arctic Ocean freezes every winter and much of the sea-ice then thaws every summer, and that process will continue whatever happens with climate change. Even if the Arctic continues to be one of the fastest-warming regions of the world, it will always be plunged into bitterly cold polar dark every winter. And year-by-year, for all kinds of natural reasons, there's huge variety of the state of the ice.

## Here is our team

**Romina Hadid**

**Model**

You can write here details about one of your team members. You can give more details about what they do. Feel free to add some links for people to be able to follow them outside the site.

**Ryan Tompson**

**Designer**

You can write here details about one of your team members. You can give more details about what they do. Feel free to add some links for people to be able to follow them outside the site.

**Eva Jenner**

**Fashion**

You can write here details about one of your team members. You can give more details about what they do. Feel free to add some links for people to be able to follow them outside the site.
